-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Claims 10 14-26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 5/1/06.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-9, 11-13, 27, and 28 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent No. 6,786,889 to Musbach et al.

Musbach discloses a balloon with visible non-radiopaque markings. Figures 1-7b show various possible combinations of the markings. The markings can be ink, die, or other suitable colored (visible) compound (column 4, lines 50-59). Figure 8 illustrates the use of the marked balloon for delivery of a stent (160). Figure 7a shows markings at the proximal and distal ends of the working section of the balloon, and Musbach explains that the body-cone interfaces are desirable positions for markings (column 3, lines 3-7). Placing a stent on this balloon would meet the requirements of claim 6. Musbach lists several possible variations of the markers in lines 8-34 of column 3, including different widths, texturized, indented, raised, and discontinuous

bands. Regarding claim 5: Musbach explains that markings on the balloon are aligned with markings on the catheter (column 6, lines 17-33).
